**DETAILED ACTION**

**Reasons for Allowance**

[01] The following is an examiner's statement of reasons for allowance:

[01a] With regard to claim 2: as noted above, Sachdeva discloses a tubular member through which an insertion unit is passed such that it changes direction from an axial direction of the tubular member to a lateral direction thereof (see Figure 2B). Sachdeva does not disclose a "distal cover member" attachable to the distal end, although the attachable distal cover member alone is likely an obvious difference. What is not an obvious difference is a passing direction changing opening formed in a lateral side of a distal cover member attached to the distal end of the tubular member. As noted above, the insertion unit disclosed by Sachdeva changes from an axial to a lateral direction. However, it does so by having a superelastic curvature which is "unconstrained" upon extension from the distal end of the (more rigid) tubular member (7/43). Although distal cover members with lateral openings exist (see, e.g., Flaherty in previous Office actions), it is not obvious to add one to the tubular member of Sachdeva, wherein the problem of direction change using superelastic curvature.

[01b] With regard to claim 13: the Prior Art does not disclose a guide tube having a metallic braid and a tube body integrated therein and having an outer diameter that is substantially identical to an outer diameter of the bending section mounted on a periphery of the flexible tube included in the insertion unit so that the guide tube can slide freely

- [02] Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
